

# BUILD YOUR TEAM

Making a bigger impact requires an investment in professional facilitators and coaches. These are our client favorites.

## THE FUN IDEA:

### Take me to the River

Have each member of the team tell the story of their life's ups and downs over the past 5 years (personal and professional). All they can use are hand drawn pictures and symbols (no letters or numbers). They have to use a river as the center of the story. On the back of the paper write three things you bring to the team, and three things you need from the team.

Supplies: plain white paper, crayons or markers

## THE WOW IDEA:

### MOZO

This is a powerful communication and collaboration exercise that is built out of a book by Istvan Banyai. The team each has 1-3 cards that have to be arranged in sequence, they can't show the other team members what they have, only describe verbally. Strategy, listening, problem solving, teamwork are all required to solve this challenging puzzle.

Supplies: Mozo puzzle and instructions

## THE IMPACT IDEA:

### DiSC

Personality and motivation assessments will help leaders and teams connect and communicate better than any other tool we have found. Simple to understand on the surface, and profoundly insightful as you dig into the details.

Supplies: Professional DiSC assessments and a trained facilitator
